# Successful splashdown!

## Two CryoTel CT-F's return to Earth on the Dragon X

NASA confirmed today that the Space X Dragon successfully splashed down today @ 12:42 EST in the Pacific. The spacecraft was returning from the International Space Station with two POLAR freezers incorporating a CryoTel CT-F cryocooler in each.

Did you know there have been a total of 52 successful CryoTel CT-F cryocooler launches into space? One of our cryocoolers has been operating in orbit for over 13 years aboard the RHESSI satellite. You can have this same level of reliability in any of our CryoTel cryocoolers, which incorporate the same design methodology and manufacturing excellence you would find in our Flight cryocoolers.

In addition to offering the most reliable cryocoolers on the market, our cryocoolers are also the most efficient, see how we compare to the competition here:

Need more convincing? Try us out on price, you might be surprised.

Our customers benefit from the unsurpassed reliability, efficiency, and power density of our superior cryocooler technology.

Please contact us at [info@sunpowerinc.com](mailto:info@sunpowerinc.com) to learn how we can help you incorporate our cryocoolers into your cryogenic application.

## CryoTel cryocoolers-

**performance. efficiency. reliability.**
